

Protective Gear “101” Instructor

The 2.5 day (24 hours) **Protective Gear “101” Instructor Program** was designed for agencies to update departmental Instructors in the care, use and maintenance of ANY Training Gear used by the agency.

This instructor program was designed to enhance the instructor's development in the combination and use of the Instructor Suits, Student Suits, Striking Shield, Arm Guards, Focus Mitts used for preparing your officers for force on force encounters. This instructor program concentrates on getting the most out of your Training Gear in its full design. This allows the student to experience the full integration of the how physical encounters occur and how to take the hits inside your gear and limit the injuries that can occur without such training. This will assist instructors on enhancing their own systems, which will improve their officer's skills, enhancing their proficiency.

Learn how to get the best use of your protective gear regardless of any type of training system you train in gear for any type of training.

Topics covered in the program include:

- Equipment and gear selection
- The purpose of using Protective Gear
- Instructor and Student Suit Orientation Drills
- Movement, Falling, Blunt trauma Drills
- How to enhance visual and auditory aids for students
- Use of Safety Coaches
- How to protect the student and staff from unnecessary injuries
- Student Evaluation and documentation
- Enhanced configuration equipment
- Using Striking Shields
- Power development
- How to Safely Use Training Props and other aids
- Weapons transitions
- Documentation & medical issues

Duration: 2.5 Days

Tuition: \$549.00
