

## Protective Mask Master Instructor (MPMI™)

This 2.5-day (24 hours) agency Master Instructor level certification program is designed for agencies to train and certify officers as “Instructor Trainers” in Protective Masks, and train them in tactics for officers who have to work in contaminated environments. This course is designed to enhance the agencies knowledge in the use of how to train in, select, inspect, clean, don, clear and seal protective masks. We will focus on how to train your officers to overcome fears and other phobias associated with wearing protective masks and how to safely operate in a protective mask in high level situations teaching the officers how to safely simulate various visual conditions and oxygen deprivation concerns an officer would be placed in when wearing any protective mask. We will address how to conduct protective mask drills for handling firearms and other weapons and acclimatization exercises needed to maintain proficiency while wearing any protective mask. The protective mask is the most important piece of equipment you will have in a contaminated environment. **Learn from the most experienced instructors in real world applications.
